Subject: RE: Northwest Environmental Advocates' supplemental comments on Oregon's CNPCP

Thanks, Allison.

I will hold off on opining on the merits of publicly re-opening the comment period

Ex. 5 - Attorney Client

Ex. 5 - Attorney Client

Ex. 5 - Attorney Client

From NWEA's letter:

Given the recent and tragic Oso slide, Northwest Environmental Advocates requests that EPA and NOAA carefully consider whether Oregon has and implements forest practices rules that prevent water quality impairments from glacial deep-seated landslides. If your review confirms that Oregon does not have such rules, NWEA requests that EPA and NOAA assess the extent of risk of water quality impairment from such slides in Oregon and, if there is any risk at all, insist that Oregon adopt additional management measures to prevent such landslides as a condition of gaining final approval for its CNPCP.

Subject: Fwd: Northwest Environmental Advocates' supplemental comments on Oregon's CNPCP

All--

We received the following supplemental comments and attachments (as well as two other attachments in a separate email) from NWEA yesterday with a request to include the items in the administrative record. The comment period has closed so adding them to the record would require us to reopen the comment period for everyone. This would require formal announcement in FR. If we do this, would also need to consider how extending comment period would affect our decision deadline.

We can discuss during our OR check in call on Monday.

Allison

Dear Ms. Gore—

Please include the attached supplemental comments and news articles in the administrative record for EPA's and NOAA's upcoming decision on Oregon's coastal nonpoint pollution control program. I'm going to send two additional scientific reports by separate email in a few minutes. Please contact me if you have any questions about the comments or any problems opening the documents. Finally, please confirm receipt of the comments.

Thank you very much for your assistance and the opportunity to comment.
